Highland Copper Announces Filing of NI 43-101 Technical Report for the Copperwood Project in Michigan, USA

Longueuil, Canada, December 5, 2017. Highland Copper Company Inc. (TSX-V: HI, OTCQB: HDRSF) (the “Company”) is pleased to announce that the Company has filed on SEDAR a technical report for its Copperwood Project prepared in accordance with Canadian Securities National Instrument 43-101 Standards of Disclosure for Mineral Properties (“NI 43-101”) and Form 43-101F1. This independent technical report supports the disclosure made by the Company in its October 19, 2017 news release. Highlights from the press release are shown below.

- 46% increase in Measured and Indicated Resources to 1.5 billion pounds of copper at 1% Cu cut-off grade compared to the previous resource estimate dated April 15, 2015
- Copper and silver resource grades largely unchanged from the previous resource estimate
- Resource newly identified in the new Upper Copper Bearing Sequence (UCBS) zone
- Mineralization remains open along strike and down dip
- Conversion from Inferred to Indicated Resource categories was robust across the deposit

The technical report entitled “Technical Report on the Copperwood Project, Michigan, USA” was prepared under the direction of Rejean Sirois ing. of G Mining Services Inc., an independent “Qualified Person” (as that term is defined in NI 43-101). Mr. Sirois has reviewed and approved the information in this news release.

The technical report is available on both SEDAR (www.sedar.com) and the Company’s website (www.highlandcopper.com).

ABOUT HIGHLAND
